EC Internet

Integrated eCommerce Desktop & Mobile Web

Our customer sites process over $100,000,000 in web and mobile orders every year into Sage ERP systems. We have the confidence and experience to guide your success in on-line business. Let us know how we can support your ecommerce objectives.

#1 Web Store for Sage Pro

EC Internets Web Pro Pack ecommerce software it the top-selling and top-performing web shopping system for Sage Pro ERP.

EC Internet team members have a deep knowledge of the Sage environment, and we have a 15-year track record of successful web store installations.

Our integration to Pro is bullet proof. Your web site will continue to perform even if your office operations are interrupted.

Mobile Devices Supported

Web stores have to work well on PCs and on all mobile devices. Responsive design allows your store to *respond* to the type and size of device it runs on.

We pioneered responsive design in 2009, and we have advanced our implementation every year since.

Mobile shopping systems require clever design solutions. For example, we use style sheet functions that automatically turn a table into a grouped list.

Web Pro Pack: Best B2B

Web Pro Pack is a Business-to-Business shopping system designed for Sage ERP platforms. It is available in commercial source licensing.

WPP has an extensive set up features: sales team quoting and customer acceptance work flows, and Sage discount pricing models, to name two.

Source Management

We have 14 years of experience managing open source platforms. We use version control to allow modular implementation and provide true PCI compliance.

Our Hosting plans include a development web site, a staging web site, and a production web site.

We also include the famous Agile Development system called Jira for QC issue tracking.

Project Management

We use agile project management techniques to keep your project moving along efficiently.

We often take the role of project manager so that contributors from all areas are on the same page. Weekly 15-minute huddles keep you fully briefed.
